Editing Buttons

Editing a Button

1. Enter **Edit Mode** by pressing the **Edit** button on the top of the toolbar.

2. Select a Blank button or the Button you want to edit.

3. When you are finished editing, click **Done** at the top right corner.

Components of a Button

1. **Button Label**
2. **Message**
3. **Symbol**
4. **Action**
5. **Style**

Editing Buttons

1. Edit the Button Label

The Button Label is the text that's visible on the Button.

2. Edit the Message

The Message acts at the user's voice. This is what's heard when using speech output. This automatically matches the Button Labe, but you can edit it by selecting the text in the Message box and typing.

3. Symbol

🔍
To search for **Symbols** - Select the Symbol or Magnifying glass to search for a symbol.

📷
To search for **Real Pictures** – select the Camera icon to take a picture **From Camera** or **From Photo Library** from pictures stored on the device.

4. Action

Actions are what the Button will do when it is selected. The default action for the Button is to **Speak or Insert Message** in the window button.

The Arrow Button means there are options. Select this button to see the options and to make a change.
